In the first year of the "Moving from Hepatitis Discovery to Elimination: NIH Research Advancing Hepatitis Elimination" series, NIDA hosted a webinar presenting the latest research related to HCV testing and treatment among persons who use drugs. See the full webinar here.

In year two of the webinar series, NIDA will host a second session focused on collaborative research on expanding access to hepatitis C prevention, testing and treatment among persons who use drugs within the criminal justice system.

**Presenters:**
Dr. Matthew Akiyama, Montefiore Medical Center and Albert Einstein College of Medicine
*Hepatitis C in the criminal legal system: Using a health systems framework to understand challenges to and opportunities for elimination*

Dr. Risha Irvin, Johns Hopkins School of Medicine
*Hepatitis C testing and treatment in Louisiana: A model for national hepatitis elimination*

**Round-Table Discussion:**
Dr. David Thomas, Johns Hopkins School of Medicine
Dr. Frederick L. Altice, Yale School of Medicine and Public Health
